
A place to thrive.

Unlocking the challenges and potential of dyslexia™.

Leading evidence-based education and summer enrichment for bright students who learn differently.

Skip summer slump. Keep academic skills tuned.

Let new learning and imagination drive curiosity and fun.

Summer Study
June 26 - July 14, 2023

K - High School, College Prep, Post Graduate

THE LEWIS SCHOOL OF PRINCETON

53 Bayard Lane
Princeton, NJ 08540
609-924-8120
info@lewisschool.org
lewisschool.org/summer

Discover the roots of a different kind of education that champions the value of thinking outside the box and understands the gifts and challenges of learning differently.™

The Lewis School's 50th Summer Program begins on Monday, June 26, 2023 and continues through Friday, July 14, 2023. We look forward to your child joining us to take advantage of an exceptional summer experience that will significantly improve learning and self-esteem.

The faculty provides an outstanding three week program that serves as a bridge, connecting the current academic year with the one yet to come. Lewis is a nurturing community, rich with the dynamic advantages of multisensory teaching. Arts-integrated, individualized learning strategies tap the many capacities and senses of the brain that make learning interesting and fun. Students are encouraged to become curious, engaged problem solvers.

Lewis students and students from other schools in the greater tristate area attend our Summer Program to benefit, reinforce, and develop greater fluency and sophistication in *learning how to learn*. The value of Lewis' educational process is validated by countless stories of success among our students and alumni. We celebrate the thousands of Lewis School students who have found their true potential as scholars, professionals, artists, and as human beings. Their stories reflect the quality of education provided by our private, competitive, college preparatory school recognized as a national leader in multisensory education for bright, learning different students.

We hope this summer will be the beginning of *your* child's success story through Lewis!

Summer Study Information

Monday, June 26, 2023 through Friday, July 14, 2023

July 4th closure in observance of the holiday

1. **Morning Academic Program**

School Level	Arrival/Dismissal Times
Lower	8:30 a.m.—11:30 a.m.
Middle	8:15 a.m.—11:45 a.m.
Upper	8:00 a.m.—12:00 p.m.

2. ***Extended Day Education (*Monday—Thursday*)**

School Level	Start/Dismissal Times
Lower	11:30 a.m.—2:30 p.m.
Middle	11:45 a.m.—2:30 p.m.
Upper	12:00 p.m.—2:30 p.m.

3. **Advanced SAT/ACT "PREP" ™ for College-Bound Juniors and Seniors** 12:15 p.m.—2:15 p.m.
   (Monday and Wednesday)
4. **Individual or Small Group Tutorials Available Upon Request** *Individually Designed*
5. **Private Speech and Language Therapy Available Upon Request** *Individually Designed*

**Extended Day Education is available to Lower, Middle, and Upper School students who are participating in the Morning Academic Program.*

Programs reach capacity early and enrollment will be on a first-come, first-served basis. If a program is not available, students will be offered alternate choices; however, The Lewis School reserves the right to cancel or change any program without prior notification.

Who Needs An Educational Assessment?

An Educational Assessment is required for students who are not currently enrolled at The Lewis School with the exception of SAT/ACT "PREP"™, although, evaluating a student's level of performance can identify and predict weak skills in need of reinforcement and repair for college. The assessment is designed to develop a detailed understanding of individual learning strengths and weaknesses. At the conclusion of the assessment, a conference with ***both parents/guardians*** is held to discuss the findings of the assessment as well as recommendations for placement.

Contact the Admissions Office at (609) 924-8120 to schedule your child's educational assessment.

Summer Morning: All Levels
Lewis Integrated Multisensory Mechanics of Language and Learning (LIMMOLL)

By combining a broad-based, arts-integrated education with the advantages of multisensory instruction, Marsha Lewis has created more than a system of teaching; she has created a community and a learning environment designed to discover and cultivate each student's unique potential and character. The Lewis School Morning Academic Program affords students the opportunity to acquire strong, multisensory learning tools, long-term strategies, and problem-solving techniques. They have the opportunity to build self-initiated and self-directed personal and academic skills that can prepare the student for future learning and for life. The Lewis School specializes in working with students who have language-based learning differences related to dyslexia, auditory processing, executive function, and attention deficits. Lewis has pioneered a proven innovative system of education that has served as a model for other educators and schools who also work with learning-different students.

Integrated, sequential multisensory instruction is offered in the following areas of study:

- Reading, Comprehension, Written Language, Vocabulary Study, Spelling, Study and Test Taking PREP™, Organization, Executive Functioning Skills, and Research—Basic through Advanced Levels
- Writing and Spelling Fluency, Accuracy, Processing Speed and Skill Application
- Auditory Attention and Organizational Skills Development including Auditory Processing and Working Memory Development
- Listening Comprehension, Auditory Memory and Expressive/Receptive Language Development
- Lecture and Text Note-Taking PREP™
- Multisensory Mathematics (All Levels)
- Speech and Language Therapy (Current School Students)

Summer Extended Day Education: All Levels

A diverse selection of afternoon programs and superb teaching create opportunities across a broad spectrum of student interest and needs. "Right brain" learners who are in the majority at Lewis thrive in an environment where their natural talents for design, arts and creative writing are cultivated by expert teaching. They are encouraged to play with new ideas and broaden their perspectives. Our programs provide valuable, fun-centered, communication-rich opportunities that promote curiosity, critical thinking, thoughtful creativity, and the formation of genuine personal concepts and interactions. Extended Day Education at Lewis combines language, performing and visual arts, science and mathematics, athletics, and speech and language.

- **Get Grounded: Ground Rules for Young Gardeners**

  Become an environmental steward! Learn how to prepare soil, sow seeds, plant bulbs, and design your own garden! Study and explore the beauty and intricacy of plant and vegetable life. When learning to grow for yourself, you'll make a meaningful connection with nature and reap the healthy benefits of gardening. In this course, you're sure to bloom and grow both inside and out!

- **Art and Nature**

  Lower school students will create pieces of personalized art with natural materials such as leaves, flowers, and sunlight. They will learn how to make leaf impressions, weave, make sunlight prints, and make floral bookmarks. The projects will have the students exploring outside, learning about nature, and learning multiple unique artistic techniques.

- **Math Games**

  Games, puzzles, and other creative activities make math fun while giving students the practice they need to build their math skills.

Summer Extended Day Education
Lower School

- **Music In Movies**

  Music is powerfully connected to the scenes of a movie, serving several purposes that are important in conveying emotion or to enhance the storytelling. Students will explore what makes music sound silly, sad, funny and more as they watch Bugs Bunny, Pirates of the Caribbean, Encanto or the like. Students will then create their own story soundtrack!

- **Athletics**

  Focus is placed on the fundamentals of various sports—all with a fun twist! Games include soccer, kickball, a number of tag games, as well as many other athletic activities. Students will work on specific skill development in several sports, balance/core stability exercises, and hand-eye coordination. The overall theme that will be stressed throughout Summer Study is sportsmanship and cooperation.

- **Got Game?**

  Got Game is an opportunity to develop social and executive function skills in a natural social context while learning a variety of games!

Soccer

Kickball

Tag Games

and More

Summer Extended Day Education
Middle School

- **The Lost City of Atlantis**

The Lost City of Atlantis, first mentioned by Greek philosopher Plato, is known as one of the greatest mysteries of the world. Was there a land called Atlantis? Where was it located? Let us submerge ourselves into investigating what life might have been like for the plants and animals that possibly thrived there.

- **No Bake Cooking**
  Calling all Young Chefs!

Students will prepare and learn about various foods and nutrition, read recipes, practice proper measuring techniques, and use various kitchen tools to prepare and then enjoy their culinary delights! No oven or baking required. Students can share their recipes and add them to the family cookbook.

- **Sassy Satchels**

Customize your own stylish cross-body satchel!

Chic and yet practical, this project features a variety of artist techniques and incorporates student design options including floral, abstract or even coat of arms to signify a specific heritage.

Imagine and create!

Edible Math and Science

Summer Extended Day Education
Middle School

- **It's a Snap!**

  Build and experiment with resistors, capacitors, LEDs, transistors, coils, integrated circuits, speakers, and more. Build a radio, and much more! Students will be using SNAP electronic kits as well as other materials to learn about circuits and electricity in this hands-on, interactive class.

- **Music In Movies**

  Music is powerfully connected to the scenes of a movie, serving several purposes that are important in conveying emotion or to enhance the storytelling. Students will explore what makes music sound silly, sad, funny and more as they watch Bugs Bunny, Pirates of the Caribbean, Encanto or the like. Students will then create their own story soundtrack!

- **Athletics**

  Focus is placed on the fundamentals of various sports—all with a fun twist! Games include soccer, kickball, a number of tag games, as well as many other athletic activities. Students will work on specific skill development in many sports, balance/core stability exercises and hand-eye coordination. The overall theme that will be stressed throughout Summer Study is sportsmanship and cooperation.

- **The Art of Acting**

  In this class, students will learn the art of acting through theater games, improvisation, and scene work.

  No acting experience is required; just a willingness to be creative and playful!

- **Fanciful Fables and Legends from Around the World**

  Listen to entertaining stories from other cultures and compare notes on how heroes are seen through the eyes of people in other countries.

- **Music In Movies**

  How much does music actually affect the movies we watch? Students explore how sounds inform how we should feel in any given moment and decide for themselves if they agree. The class will listen to the music of John Williams, Hans Zimmer, and others, with the accompanying movie clips to discover movies in a whole new way!

Summer Extended Day Education
Upper School, College Preparatory and Post Grad

- **Athletics**

  Attention is given to improving gross motor skills, team building, and improving skills in sports such as soccer, handball, kickball, and capture the flag. Students will have the opportunity to play in a competitive environment appropriate to their skill level. The overall theme that will be stressed throughout Summer Study is sportsmanship and cooperation.

- **Words and Images**

  Explore various ways to see the world through words! Create poetry based on fire, water, earth, and air or images inspired by individual interpretations.

- **Math**

  Through a range of multisensory activities, students are taught to make relevant connections between the mathematical course content, other areas of study, and their life experiences.

- **Got Game?**

  Got Game is an opportunity to develop social and executive function skills in a natural social context while learning a variety of games!

Extended Day

Private Speech and Language Therapy

Available Upon Request—Fees Apply

Programs reach capacity early and enrollment will be on a first-come-first-served basis.

Offerings include but are not limited to:

- Apraxia
- Articulation
- Auditory Processing
- Executive Function/Organization
- Expressive and Receptive Language
- Fluency
- Memory
- Pragmatics/Social Skills
- Problem Solving
- Public Speaking
- Social Intelligence
- Voice

Extended Day

Individual or Small Group Tutorial Instruction

Available Upon Request—Fees Apply

Programs reach capacity early and enrollment will be on a first-come, first-served basis.

Course offerings include but are not limited to:

- Mechanics of Language: Improvement of Reading, Writing and Spelling Fluency
- Lewis Handwriting System, Lewis Directionality Training, Lewis Left-Right Orientation, Sequencing and Organizational Skills
- Lewis Task Attention and Tolerance Skills
- Visual-Spatial Awareness and Planning
- Math Skills Building Lab
- Multisensory English Language for Reading Comprehension
- Multisensory English Language for Writing Comprehension
- Content Class Support Labs: All Sciences and Math Classes
- Advanced Mathematics for the Mathematically Gifted
- Organizational, Note-Taking and Study Skills Labs

SAT/ACT "PREP" ™

"Preparing to Realize Exceptional Potential"™

FOR STUDENTS WHO LEARN DIFFERENTLY

ADVANCED SAT/ACT "PREP"™ for College-Bound Juniors and Seniors

Full Test Preparation Strategies

Monday and Wednesday, 12:15—2:15 p.m.

Instructor: Mrs. Hansen

Lewis School SAT/ACT instruction is multisensory, disciplined, rigorous and brings the advantages of multisensory learning in test preparation. This course is ideal for students who want to significantly improve their performance on the SAT/ACT. The approach taken at the Lewis School involves teaching the structure of the exam including how to read, interpret and answer diverse types of questions. The SAT/ACT course targets reading, writing, mathematics and science materials at a college-level of proficiency featured on the test as well as directing the student's attention to master the materials, structure and automaticity needed to meet the demands of the new SAT/ACT.

SAT/ACT "PREP" at Lewis prepares students for what neuroscientists describe as "task switching" by featuring a blend of topics typically found in the "verbal", mathematics and science sections. When students take the exam, they are asked to alternate between Critical Reading, Writing, Math and/or Science. Therefore, a preparation that rigorously incorporates such alternation is integrated in every aspect of this course of study. Each student acquires multisensory mechanics of language that facilitates written comprehension, word meaning and the detection of syntax or stylistic errors in writing. Since mathematics and science are separate languages, students will learn to analyze the meaning of word and numeric problems, interpret graphs and recognize problems.

The Lewis School specializes in working with students who have language-based learning differences related to dyslexia, dyscalculia, auditory processing, ADD and ADHD. The teaching approaches of the SAT/ACT offers great advantages for students with language-based learning differences and many traditional learners who seek the advantages of Lewis SAT/ACT preparation.

This Course Helps Students Prepare for College Reading and Writing

Small Class Sizes • Small Group Tutorials • Practice Tests

Reinforcement of Vocabulary – No Memorization of Word Lists

Multisensory Reading Comprehension Strategies

Our Mission

The mission of The Lewis School is to educate and to empower bright young people whose scholastic achievement and human potential are significantly hindered by language-based learning issues. It is to provide these promising students with the most exceptional multisensory educational opportunity possible within a school community specifically attuned and responsive to each student's academic needs, and to the nurture of the whole person. It is to explore and prosper each student's gifts and great promise.
